Martin Leitner

Personal Information

Gender: Male
Age: 32
Nationality: German
Location: Munich, Germany

Education:

PhD in Computer Science
Technical University of Munich, Germany

Experience:

Data Scientist
Data Automotive Technologies
- Developed and implemented machine learning models for predictive maintenance and anomaly detection in automotive systems.
- Collaborated with cross-functional teams to identify business opportunities and drive data-driven solutions.

September 2020 – Present (3.5 years)
Munich, Germany

Research Assistant
Institute for Artificial Intelligence, Technical University of Munich
- Conducted research in natural language processing and knowledge representation, with a focus on semantic parsing and entity linking.
- Published several papers in top-tier conferences and journals in the field of AI and machine learning.

January 2018 – July 2020 (2.5 years)
Munich, Germany

Skills:

- Proficient in Python, Spark, and Dask for scalable data processing
- Strong background in machine learning and statistical modeling
- Experience with open-source LLMs and natural language processing techniques
- Excellent communication and leadership skills
- Fluent in English and German
